Fabric Care

Wipe frequently with a damp cloth to maintain the appearance of the fabric

Most stains can be removed using cold/warm water and a clean cloth

Use cold water when treating stains caused by bodily fluids

Stains from products containing oil and grease should be treated with a spirit based solution

If soap based cleaners are used, all soap residues must be rinsed from the fabric

Can be cleaned with mild Hypochlorite solutions (half a cup of household bleach with 5 litres of water) or Mineral Spirit

Can be steam cleaned in situ

Do not dry clean

Machine wash with extreme care

Please note that the longer stains are left untreated the more difficult they will become to remove

Please refer to the fabric care sheet on the Agua website for further details
